Executive Equipment Performance Report

REPORTING PERIOD
February 2026
Prepared 22 February 2026

VALIDATED SYSTEM DATA

EXTRACTION READY

Report Date: 22 February 2026
Unit: Hydraulic Excavator HX-220
Total Hours: 214.75
Fuel Consumption: 9,480
Productivity: 71,350

ASSET CLASS
Heavy Earthmoving Equipment

OPERATIONAL STATUS **Active - Normal**

OPERATING HOURS
214.75
hours logged

FUEL CONSUMPTION
9,480 L
monthly usage

PRODUCTIVITY
71,350
output achieved

EXECUTIVE ASSESSMENT

Strong output with controlled utilization

Hydraulic Excavator HX-220 delivered stable production throughout the reporting period. Operating hours supported planned utilization, while fuel consumption remained within the approved monthly operating range.

STATUS: PERFORMING

OPERATIONAL HEALTH

Availability	96%
Fuel efficiency	90%
Target attainment	95%

MANAGEMENT PRIORITIES

01 Inspect hydraulic systems
Complete the scheduled pressure and leakage inspection.

02 Track idle fuel usage
Review idle-time consumption during the weekly control cycle.

03 Sustain output quality
Maintain current operating parameters and operator practices.

DATA ASSURANCE
Structured for deterministic extraction and validation in OpsInsight.

Document ID: OPS-HX220-2026-02-002
